

Guaranteed Trade

Guaranteed Trade is an industry first that empowers the dealer and the customer. Utilizing the consumer-facing tool, the customer captures their vehicle information, feeds it to the dealership, and receives a tangible appraisal value, all in the comfort of their own home.

The dealer is in full control of the value. Guaranteed Trade gives you a competitive advantage by providing the customer with the experience they desire.

Getting Started

Once the customer has downloaded the app, they are prompted to follow the walk-around steps to capture exterior and interior photos, as well as any applicable damage photos.

As they go through the steps of decoding their VIN and confirming options, they will be asked some basic questions in order to help you send them a guaranteed trade value.
